

GERVÁSIO ARTUR DOMBO

Backend Developer

+5585997518647 gervasioarthur@gmail.com <https://www.linkedin.com/in/gervasio-dombo/> Fortaleza - CE

SUMMARY

I am a backend developer with solid experience in Java and Spring Boot, specializing in the development and maintenance of scalable, high-performance RESTful APIs. Throughout my professional journey, I have also worked with **TypeScript and C#**, which has broadened my versatility and adaptability to different technology stacks and project contexts.

I have experience with both microservices and monolithic architectures, with a strong focus on **version control (Git)**, **continuous integration and delivery pipelines (CI/CD)**, and cloud environments. I prioritize best engineering practices, writing clean, testable, and maintainable code while adhering to principles such as **SOLID, TDD, and Clean Code**.

I am driven by technical challenges and strive to deliver solutions that generate real value for the business. I am committed to continuous professional development and seek to actively contribute to high-performance teams by combining technical quality with collaboration and accountability.

EXPERIENCE

Junior Systems Analyst

Remote

[Intersite](#)

11/2024 - 05/2025

- Worked on the development and maintenance of the **Transport Administration System (SAT)**, contributing to the evolution of a critical system used by managers and logistics operators.
- Implemented new features and improvements using **JSF, Java, PostgreSQL, and JPA (Hibernate)**, applying best practices in object-oriented development.
- Active collaboration in an agile team with **Kanban methodology**, participating in ceremonies and contributing to the continuous delivery of value.
- Participated in 1:1 meetings and demand refinement sessions, providing technical insights and promoting alignment between departments.
- Conducted frequent **pair programming and code reviews**, fostering knowledge sharing, code standardization, and increased technical quality.
- Provided technical support and managed the **PostgreSQL** database, ensuring availability, security, and performance of operations.

Mid-level Fullstack Developer

Ceará - Fortaleza

[Sesa - Health Secretariat](#)

08/2022 - 06/2024

- Developed hospital and inventory systems with **Java, JSF, Spring Boot, C#, and .NET**, ensuring high performance and scalability.
- Integrated clinical data in real time, enhancing the reliability and security of critical public health information.
- Actively collaborated in agile squads (**Scrum**), focusing on the continuous delivery of high value for end users.
- Significantly contributed to the evolution and stability of essential systems, strengthening public health infrastructure.
- Participated in **versioning and continuous integration (CI/CD) with Git**, ensuring organization and traceability of code.
- Proactively sought improvements, shared knowledge, and engaged in continuous learning, participating in internal and external training.

Junior Backend Developer

Fortaleza

[Blu Installation Services Ltda](#)

05/2022 - 08/2022

- Developed the billing platform **Blu Valida**, focusing on reliability and scalability.
- Implemented RESTful APIs with **Node.js (TypeScript)** and **PostgreSQL**, following **Clean Architecture** principles to ensure maintainability and code quality.
- Deployed in **Heroku and AWS** environments, prioritizing security and scalability.
- Engaged in **automated testing** practices, ensuring high quality and reduced incidence of production errors.
- Ensured compliance and security in payment processes, aligning with best practices and regulations.
- Actively collaborated in an agile team, participating in code reviews and contributing to the continuous evolution of the platform.

EDUCATION

Technologist in Systems Analysis and Development

Ceará - Fortaleza

Estácio de Sá

2022 - 2025

- Enrolled (-)

LANGUAGES

English (Intermediate)

SKILLS

Express.js, AWS, C#, EC2, Git, GitHub, GitLab, Heroku, Java, Java Spring, JPA, Kanban, MongoDB, Next.js, PostgreSQL, Redis, REST, S3, Scrum, SpringBoot, TypeScript, Node.js, Hibernate, Express.js, .NET, GitHub Actions, GitLab CI, ChatGPT, Gemini AI, N8n, NestJS, ClickUp, Jira, Microservices, Kafka, TDD, JUnit5, Jest, Mockito, React.js, Docker, Fly.io, SonarQube, JSF, PrimeFaces, RichFaces
